

## COMPETENCY MAPPING

**Title**  
**STCW Table**

**Table A – III / 2**  
**Specifications of minimum standards of competence for chief engineer officers and second engineer officers on ships powered by main propulsion machinery 3,000 kW propulsion power or more**

### GUIDANCE NOTES

TERMS	DESCRIPTION
<b>Positive Reward</b>	<i>Score will increase in the assessment criterion / may be combined with increased gradual scoring Bonus points, an integer within the range of 0 to 100. The default value is 0.</i>
<b>Negative Penalty</b>	<i>Score will decrease in the assessment criterion / may be combined with decreased gradual scoring Penalty points, an integer within the range of 100 to 0. The default value is 100.</i>
<b>Triggered Once Single</b>	<i>A trigger is activated once. A rule is triggered in the scenario only once: the first time the conditions occur.</i>
<b>Multiple Circular</b>	<i>Assessment scoring can be started multiple times. A rule is triggered every time the conditions occur.</i>
<b>Delay Time Dependency</b>	<i>The assessment scoring can be delayed in order to give the student some reaction time, for example after a malfunction has been activated. Time dependency ruling</i>
<b>Critical Criterion Weight</b>	<i>The assessment must be achieved in order to pass the test. Multiplier of a trainee's level of competency.</i>

#### **Contents of Level of the Simulation**

- Management** - relates to the management of the combination of systems to perform a given job
- Communication** - relates to effective communication between human resources to report, get feedback, or to execute a task
- Emergency** - task performed in circumstances where there is variation or deviation from an expected scenario or situation
- Crisis** - task performed when the emergency has developed into a crisis

**Color Coding:**

to ensure safety of life at sea, security and the protection of the marine environment	<p>international agreements and conventions</p> <p>Regard shall be paid especially to the following subjects:</p> <p>C11.1.1 certificates and other documents required to be carried on board ships by international conventions, how they may be obtained and the period of their legal validity</p> <p>C11.1.2 responsibilities under the relevant requirements of the International Convention on Load Lines, 1966, as amended</p> <p>C11.1.3 responsibilities under the relevant requirements of the International Convention for</p>	<p>relevant international maritime law embodied in international agreements and conventions</p> <p>2. Monitor compliance especially to the following:</p> <p>.1 certificates and other documents required to be carried on board ships by international conventions, how they may be obtained and the period of their legal validity</p> <p>.2 responsibilities under the relevant requirements of the International Convention on Load Lines, 1966, as amended</p> <p>.3 responsibilities under the</p>	<p>and maintenance comply with legislative requirements</p> <p><b>Criterion W</b> Potential non-compliance is fully identified</p> <p><b>Criterion X</b> Requirements for renewal and extension of certificates ensure continued validity of survey items and equipment</p>	<p><b>C11.1.1, C11.1.5</b> 1. Engine crew involved in the operation must have valid certificates and must be medically-fit to comply with International Health Regulations requirements</p> <p><b>C11.1.2, C11.1.8</b> 2. Request the officer and/or duty-able seafarer deck to monitor the forward, middle and aft draft and compute for the trim before, during and after bunkering operation to comply with International Convention on Load Lines, 1966, as amended</p> <p><b>C11.1.3, C11.1.6</b> 3. Prepare firefighting equipment e.g. fire extinguisher prior to start of bunkering operation to comply with the International Convention for Safety of Life at Sea</p> <p><b>C11.1.4, C11.1.7</b> 4. Monitor the vessel surroundings regularly and SOPEP materials must be prepared prior bunkering as precaution to prevent pollution of the environment by ships</p>
